EXAMINER'S AMENDMENT

1. A response was received on 11 October 2007. By this response, Claims 1, 4, 9, 10, and 26-28 have been amended. Claims 30-39 have been canceled. New Claims 40-50 have been added. Claims 1, 3, 4, 9, 10, 26-29, and 40-50 are currently pending in the present application.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Irah Donner on 04 January 2008.

3. The application has been amended as follows:

Art Unit: 2137

IN THE CLAIMS:

Please **REPLACE** Claims 41, 42, 44, 45, 47, and 50 with the following amended claims.

41. The method of claim 4, wherein the user specific portal Web page displays to the user services ~~[[that]]~~ to which the user can optionally subscribe.

42. The method of claim 4, wherein the user specific portal Web page provides to the user a captive portal environment ~~for the user~~.

44. The method of claim 43, wherein the service bundle comprises ~~[[all]]~~ content resources provided by a particular content provider.

45. The method of claim 43, wherein the service bundle comprises ~~[[all]]~~ content resources paid for with a single monthly fee.

47. The method of claim 43, further comprising:

~~Automatically~~ automatically associating the user to the service bundle if the user belongs to a pre-specified subscriber group.

50. The method of claim ~~[[45]]~~ 49 wherein the one or more advertisements are targeted to appeal to the user based on the user's subscriptions of content resources.

Allowable Subject Matter

4. Claims 1, 3, 4, 9, 10, 26-29, and 40-50 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Independent Claim 1 is directed to a method for managing content resources that includes receiving a subscription request specifying a user specific content resource, determining whether a user is authorized using the user's IP address, determining a network resource requirement for presenting the user specific content responsive to user specific content rules, and providing a network resource to transmit the content resource based on the resource requirement and the user specific content rules to satisfy the request. The closest prior art, Amin et al, US Patent 6714987, as previously cited, discloses a method including receiving a subscription request specifying a content resource, determining that the user is authorized to access the resource using the user's IP address, determining a network resource requirement required for presenting the resource, and providing a network resource based on the network resource requirement to satisfy the request. However, Amin does not disclose that the content resource is user specific, nor does Amin disclose user specific content rules. Norris, US Patent 6718328, discloses restricting access to content to specific users based on a user's IP address; however, Norris also does not disclose user specific content rules. Huston et al, US Patent 7243136, also discloses managing user-specific content and the use of IP addresses in determining authorization; however, Huston also fails to

Art Unit: 2137

disclose user specific content rules. Therefore, the subject matter of independent Claim 1 is patentable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
